

**Partnership offer
of locating production in Ukraine**

This offer of partnership is important for companies focused on the production of high-tech devices for the consumer and for military purposes. The target market can be Ukrainian and any other partner of choice.

This offer of partnership is important for companies focused on the production of high-tech devices for the consumer and for military purposes. The target market can be Ukrainian and any other partner of choice.

Equipment available at the factory allows devices for various applications

- ☞ Telecommunications: Payphones of various modifications, exchanges
- ☞ Plastic cards: contact, contactless, magnetic stripe
- ☞ Energy: Electricity meters for residential, small engine and industrial sectors (more than 20 kinds of appliances), automatic control and accounting of energy
- ☞ Commercial equipment: vending terminals, cash registers
- ☞ Heating appliances: electric heaters, fan heaters, car inverters, fire sensors, fuel sensors
- ☞ Equipment for the city: automatic parking complex, automated access control system (ACS for subway), GSM control, lift terminals, systems for access to the public transport

Factory complex includes such areas

Plastic cards section

Factory complex includes such areas

Mounting section

Mounting section is specialized in manufacturing of circuit modules of any complexity.

The section has the following facilities:

automated installation and soldering of SMD-components (from SMD020 to BGA) on circuit plates;

forming radio elements;

Manual soldering of radio elements on circuit plates;

manual installation of output radio elements on circuit plates using light mounting tables, followed by automatic wave soldering, automatic cleaning of circuit modules with unsoldered radio elements;

optical checking quality of SMD components installation on circuit plates;

electrical test check circuit module (checking for absence of short circuit, integrity of conductor strips, checking radio elements nominals);

climatic test of circuit module (at temperature 70-1880 degrees C) Humidity 10-95%);

Factory complex includes such areas

Blank preparation section

Blank section is specialized in manufacturing cable production and wire-wrap articles of inductance coil, transformers.

The section has the following facilities:

- automatic cutting of wires, cables, tubes any length, removal of wire isolation;
- wire conductors tin coating;
- insulating tubes heat shrink;
- semi-automatic contacts crimping , cable end sleeves, wire lugs;
- printing identification tags on cables;
- unsoldering of conductors on connector pins and assemblage of connectors;
- sealing of connectors;
- bundled wire production;
- installation of spiral bonding on optical cable;
- manufacture of inductance coils and transformers (in line and toroidal winding).

Factory complex includes such areas

Engineering workshop “Akatsiya M”

Engineering workshop "Akatsiya M" includes 61 engineering units, 36 workshop employees and consists of three sections: machining section, turning section and fitter section.

The list of equipment is supplied.

The workshop equipment allows to manufacture small parts, medium parts and basic part from component blank /billet to ready closed cycle production.

The time of any component manufacture using the equipment listed below depends on the component complexity, material quality and processing treatment.

Qualification of workshop employees, as well as material and technological fitting out allow to fulfill set tasks to a good quality and in due time.

Factory complex includes such areas

Tool Workshop

Tool workshop manufactures die casting moulds for non-ferrous alloys and plastic components with maximal size of plates 700x700mm die molds for rubber, various appliances, drill jigs. Total area of this shop is 783 sq. m., and the number of employees amounts to 35 persons.

Factory complex includes such areas

Other sections:

- **Galvanics Section**
- **Frame Press Section**
- **Section Of Aluminum And Rubber Technical Articles Casting**
- **Section Of Injection Molding Machines**
- **Optional Equipment Section**
- **Sections Of Printed-Circuit Painting And Varnishing**
- **Cardboard and Wooden Containers Section**
